

The only soft bait  
rodenticide approved for  
both outdoor and indoor use.

- Greater palatability than traditional wax blocks
- Doesn't melt in hot temperatures
- Contains the most commonly used active ingredient, bromadiolone, in a superior wax-free formulation

## The only rodenticide you need.

Liphatech, The Soft Bait Innovators™ and makers of FirstStrike®, bring you a wax-free bait that is superior to traditional blocks.

**Control**—RESOLV to have more effective performance.\*

**Simplify**—RESOLV to use it anywhere.

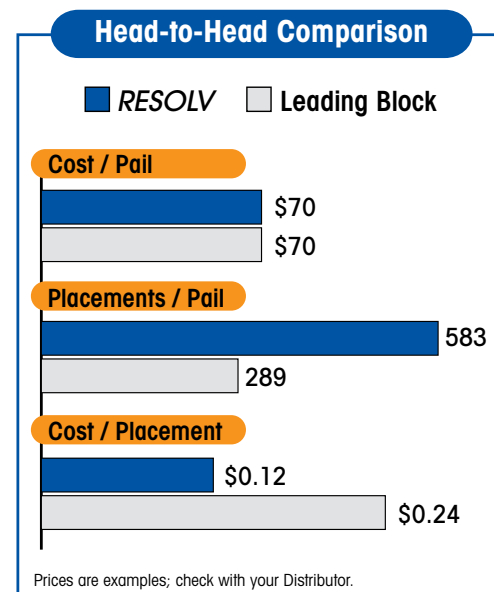

**Performance**—RESOLV to get better results.

**Economical**—RESOLV to avoid 1.7 kg of wasteful wax filler.\*\*

- Labeled for indoor and outdoor use
- Greater performance versus traditional wax blocks
- Aroma escapes through pouch to attract rodents and encourage feeding
- Low cost-per-placement compared to traditional wax blocks
- Made with active ingredient, bromadiolone, invented and patented by Liphatech
- Works in single feeding for great results
- Maintains its integrity and shape at high temperatures
- Can be quickly and securely fixed on vertical or horizontal rods, reducing chance of translocation by rodents
- 12 gram pouch contains food grade oil and grains; nut-free; bittering agent to discourage non-target feeding
- Contains no seeds, reducing debris and service time
- Professional grade rodenticide available in 7 kg pails (approx. 583 pouches per pail)

Try the advanced wax-free rodenticide technology: soft bait.
